Memo to File:

RE: Proposed Azeredo Minerals
Operation
Bauer Tailings
~~PRO/045/000~~ DOE/045/024
Tooele County, Utah

On July 14, 1983, Susan Linner and Tom Portle visited the above-referenced site. The gate which excludes access to the old town and float mill was kindly opened by Mr. S. R. Hullinger (whom we had met earlier regarding the Crystal Mine).

A large tailings pond is in existence at the Bauer site. The foundation of the old float mill marks the site as do a caved railway tunnel and abandoned mine buildings, and homes, many of which are well preserved.

Mr. Hullinger commented that he had been contacted by Azeredo Minerals regarding earthwork. He said that nothing had been agreed on. The article in the Utah Mining and Oil Gazette had said that work was to begin in August (!) and that McFarland and Hullinger would be enlisted!

No sign of activity was observed.
